\*Also available for Apple iOS Mobile devices.

**Mobility.** The continued growth and escalating popularity of Android OS devices across all markets and industries has heightened the demand for mobile users to print directly from their Android OS devices as well as scan documents for instant access. With PageScope® Mobile, Konica Minolta offers a feature-rich assortment of utilities that provide the everyday document imaging tools and connectivity necessary for mobile users to easily access and manage their documents.

PageScope Mobile provides a secure platform for mobile printing and scanning applications. The wireless technology operates on your organization's existing private wireless network. The mobile user logs into a secure network using their log-in credentials at the mobile device. Once the user is authenticated, they can safely access networked bizhub MFPs from their tablet or smartphone.

The best part – it's free and downloadable from the Google Play Store.
